

A
WATERFUL
DAY

FILTERED WATER
WHEREVER YOU ARE

THE PROBLEM

**STATEMENTS ON WATER,
OUR MOST PRECIOUS NATURAL RESOURCE**

"An estimated 20 billion euros a year will have to be invested to solve the problem of 400,000 km of dilapidated water pipelines in Germany."

Deutsche Bank Research

"Diarrhoeal diseases as a result of inadequate water supply affect four billion people a year - one child under the age of five dies every 20 seconds."

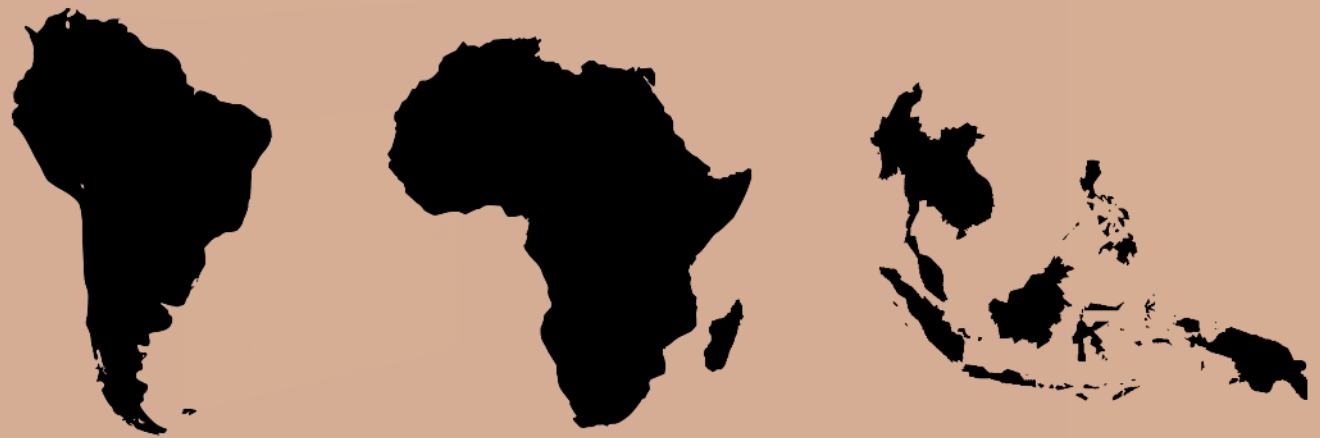

World Water Day 2014

"Water is becoming scarce and its quality is at risk. Around half the world's population uses water of dubious quality due to a lack of access to drinking water."

WHO 2001

"An adult should consume an average of two litres of liquid, preferably in the form of water."

Federal Ministry of Health

"Only 0.3% of the world's water resources can be used as drinking water!"

Water Congress 2014 in Vienna

"Over one billion people have no access to clean drinking water."

WHH Water Sector Report

"Levels of nitrate in groundwater in Germany are increasing due to the over-fertilisation of soils."

Stiftung Warentest 05/2015

"One of the solutions to the problem is filtration directly at the point of use."

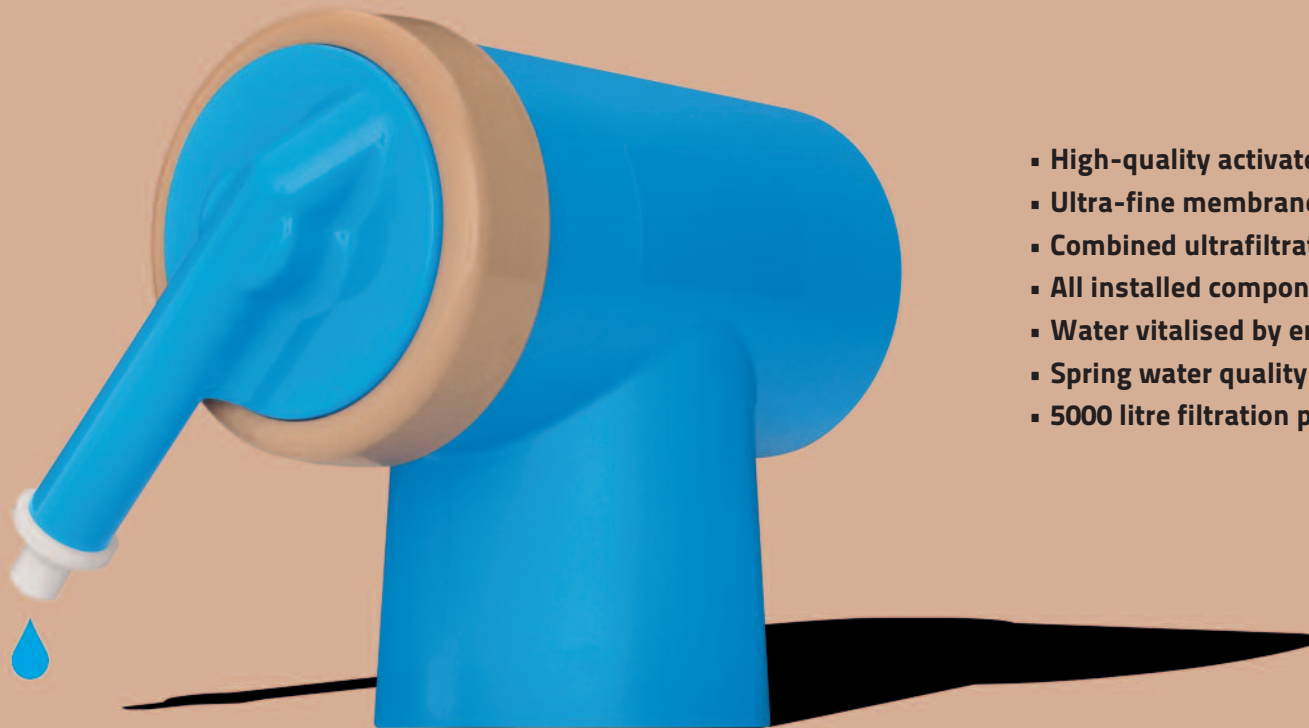

World Water Day 2014

THE SOLUTION: UJETA WATER FILTER

The unique design of the UJETA water filter makes it one of the smallest and most effective water treatment systems available. Weighing just 340 grams, this mobile water filter is reliable and can be set up quickly. This system brings about a sustained improvement in drinking water supplies worldwide,

because it filters water where it is used rather than where it is extracted. Filtering water directly at the point of use is highly efficient. And the attractive price-performance ratio of the UJETA makes it affordable for everyone. **It's a waterful friend !**

- High-quality activated carbon filter "Made in Germany"
- Ultra-fine membrane for maximum filter performance
- Combined ultrafiltration as per LOG 6 classification
- All installed components are food-safe
- Water vitalised by energising crystals
- Spring water quality with special swirl technology
- 5000 litre filtration performance

UJETA HOME+TRAVEL

TEN GOOD REASONS FOR YOU
TO CHOOSE THE UJETA WATER FILTER

1 COMBINATION OF
ACTIVATED CARBON AND
MEMBRANE FILTER

2 AT HOME AND AWAY -
THE WATER FILTER
IS YOUR DAILY
COMPANION

3 ALWAYS FRESH
RUNNING WATER
QUALITY

4 CRYSTAL-CLEAR
AND INVIGORATING

5 UNBEATABLE PRICE-
PERFORMANCE RATIO

6 UP TO 5000 LITRE
FILTER PERFORMANCE

7 YOUR OWN
SPRING WATER

8 CONSERVE THE
ENVIRONMENT

9 SIMPLE
PLUG & PLAY
INSTALLATION

10 NO MORE CRATES
TO HAUL

HOW IT WORKS

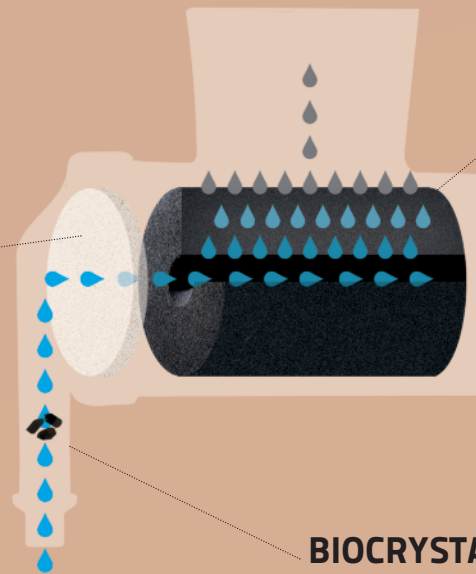

CUTAWAY VIEW OF THE UJETA FILTER

UJETA FILTER REDUCES/REMOVES:

- 99.9995% of all bacteria
- 99.9995% of all germs
- Heavy metals (e.g. lead & copper)
- Drug residues
- Chlorine and its by-products
- Pesticides
- Organic compounds
- Asbestos fibres

MEMBRANE FILTER

- HIGH-TECH hollow fibre membrane
- Minerals are preserved in the water
- Filter fineness of up to 0.1µm retains bacteria, fungi, germs, metal particles and microorganisms

ACTIVATED CARBON FILTER

- Pure activated carbon, a natural product
- Patented refining process
- Residue controlled and LGA monitored
- Designed and manufactured in Germany
- Filter fineness of up to 0.45µm combined with the high absorption effect of activated carbon

BIOCRYSTALS

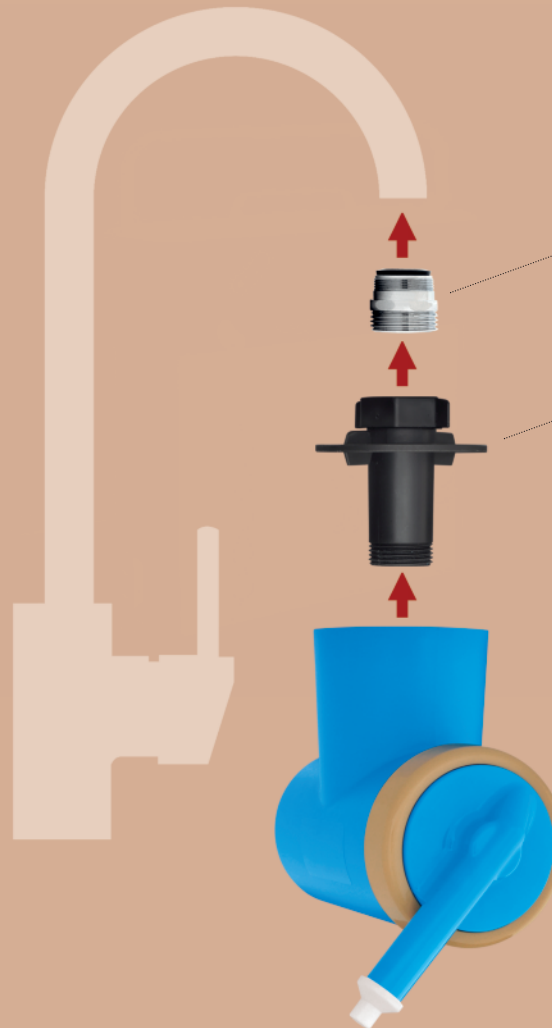

- Special swirl technology
- Energising crystals
- Restores springwater quality

SIMPLICITY ITSELF

SIMPLY FIT THE SWIVEL ADAPTER TO THE UJETA WATER FILTER.

It will fit many commercially available taps if used in combination with the Perlator adapter.

The only tool you will need is a pipe wrench to undo the Perlator on your tap and fit the supplied Perlator adapter.

PERLATOR-ADAPTER

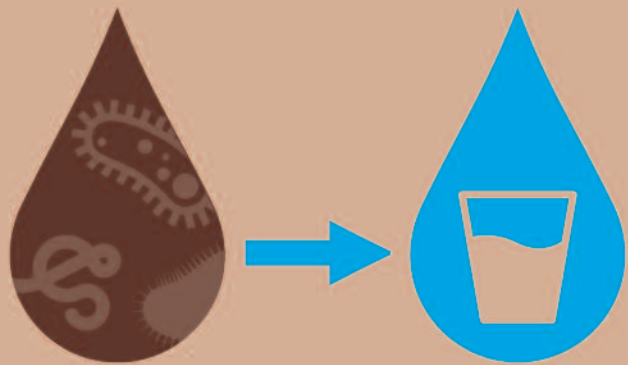

- Perlator adapter M24
- For connections with internal thread

UJETA SWIVEL ADAPTER

- Suitable for 3/4-inch external thread
- Food-safe
- Built-in sealing ring
- Wing screw for easy installation
- Designed and manufactured in Germany

UJETA WATER FILTER

- High-quality activated carbon filter "Made in Germany"
- Ultra-fine membrane for maximum filter performance
- Combined ultrafiltration as per LOG 6 classification

UJETA CARE

THE UJETA WATERCASE ENABLES YOU TO FILTER WATER WITHOUT A MAINS SUPPLY OR POWER.

This means that you can simply use the UJETA water filter to produce drinking water from surface water (lakes, rivers, fountains).

We thus offer a solution that can be deployed in crisis areas, in regions hit by natural disasters or in regions with a generally inadequate water infrastructure to ensure a basic supply of drinking water. The case basically consists of a plastic housing designed to convey water (and to prefilter coarse particles), an UJETA HOME&TRAVEL filter, a cartridge and a pump unit.

Another unique feature is its ease of operation, which is quite literally child's play. It is designed in such a way that women and children can prepare clean drinking water for themselves. The case weighs approximately 12.5 kg when filled with 10 l water.

THE RESULT: CLEAN, CLEAR DRINKING WATER!

WATER TESTS WITH UJETA WATER FILTER

THERE ARE WATER POLLUTIONS IN TO 1000-FOLD VARIATIONS

So we carry out constantly microbiological investigation to guarantee the effectiveness of the Ujeta water filter for your health

Our tests are carried out by the famous drinking water lab under the direction of Dr. Staber. Besides, the changes of the water are measured under scientific conditions in a before /after investigation by a filtration with an Ujeta water filter

EXTRACTS FROM THE TEST RESULTS: BRACKISH WATER FROM THE POND

Parameter	Without water filter	With water filter	Unity	Limiting value	Process
Coliforme bacteria	1	0	MPN/100ml	0	Colilert-18/Quanti Tray
E.coli	200,5	0	MPN/100ml	0	Colilert-18/Quanti Tray
Intestinale Enterokokken	3	0	KBE/100 ml	0	DIN EN ISO 7899-2 (K 15) 2000-11

The efficiency of the Ujeta was confirmed by many other tests. Reduction of bacteria, germinates, drug residues, heavy metals, chemicals and pesticides for Log 6.

THE UJETA GMBH

- **ALL UJETA PRODUCTS ARE MADE IN GERMANY.**
- **THIS GUARANTEES THE HIGHEST PROCESSING STANDARDS AND SECURES JOBS.**

SCHNEIDER
KUNSTSTOFF
TECHNIK

COMPANY POLICY

- Reliable and flexible customer care
- Experience of international trade with customs and export regulations
- Medium-sized enterprise with the personal touch

QUALITY CLAIM

- Production in Germany in line with the highest quality standards
- Highest processing standards
- Quality product "Made in Germany"
- Reliable and flexible capacity to deliver on schedule

PRODUCTION:

Schneider Kunststofftechnik GMBH

- Schneider Kunststofftechnik is a traditional firm responsible for producing UJETA filters. It has specialised in plastics processing for over 20 years.
- Successful company compliant with DIN EN ISO 9001 & DIN ISO 14001
- UJETA GmbH and Schneider Kunststofftechnik GmbH have been partners from the start.
